

SE Labs

"SE Labs is a cyber security business that relies heavily on strong internet connections. TWC has been a partner since we started our first London lab and its flexible approach to problem solving is first class.

We run extremely realistic tests on security products and need to emulate many different types of business network. TWC's reliable service has stood up to the challenges posed by our extreme needs. If they can handle us, they can handle anyone!"

Simon Edwards, CEO
SE Labs Ltd
